New Portal Page for Workplace Inspection Documents 28 April 2023

Given the number of documents and the frequency they are used, we have created a dedicated page on the portal for workplace inspection references. The page can be found from the EHS landing page (third row down, icon on the left). If you notice any documents missing, please reach out to EHS, and as always if you have suggestions to make the EHS portal easier to use, please let us know.
